

JACOB PÉREZ WIBE

Electrical Engineering Student

A proactive BSc Electrical Engineering student at the NTNU (Norwegian University of Science and Technology) with strong academic achievement, proficiency in several languages and an interest in space technology. Possesses communication and teamwork skills as well as fluency in three languages (German, Norwegian, English). Always keen to pursue knowledge in any field of work.

Due to my personal career, I have become familiar with different cultures of the world. Therefore, I can quickly adapt to new situations, stand out as open-minded and curious and enjoy working in a team. I enjoy challenges and puzzles.

Education

Bachelor of Engineering (BIELEKTRO)

NTNU
2022-2025
Trondheim, Norway

High School/ Abitur

Sportschule Potsdam
2019-2022
Potsdam, Germany

Middle School

Max Beckmann Oberschule
2018-2019
Berlin, Germany

German School London
2012-2018
London, UK

Other experience

Guide at Nidarosdomen

NDR Summer 2024

As a tour guide at a historic cathedral, I developed public speaking skills and the ability to present complex information clearly. Conveying architectural details and historical facts to diverse audiences honed my ability to communicate technical concepts effectively. This experience has also enhanced my organizational and teamwork skills.

Experience

Track&Field Coach

Trondheim Friidrett Dec 2022 - June 2024

My role encompassed coaching and creating training programs mostly related to running for 10-12 year old children and preparing them for competitions. Here I have gathered important skills such as teamwork, long-term planning and motivating others.

Electrical Engineer

Orbit NTNU Jan 2024 - June 2024

Orbit NTNU is a student organization developing satellites. In the Electronic Systems Team I have been learning coding and simulating Verilog HDL as we are in the process of implementing an FPGA into one of the next satellites that will go to space!

Satellite Communications Engineer

Orbit NTNU Sep 2022 - Dec 2023

In the first year of being part of the Satellite Communications Team I spent most of my time getting used to all of the fundamentals such as working professionally in a team/organization and working self-dependently. I also taught myself the basics of web-development: <https://folk.ntnu.no/jacobpw/>
